Experience

Software Engineer, Rayze – New York, NY September 2025 – Present

- Architected and deployed a CLI-based autonomous agent framework to automate internal data workflows, utilizing RAG (Retrieval-Augmented Generation) to provide agents with real-time codebase context
- Migrated legacy JavaScript codebase to TypeScript, improving maintainability and reducing runtime errors by implementing strict type checking across high-traffic web and mobile platforms
- Demonstrated strategic problem framing by identifying and replacing brittle LLM-based parsing chains with deterministic Python scripts and regex, improving system reliability to 100% and reducing latency
- Engineered and deployed a CI/CD pipeline using GitHub Actions and automated evaluation harnesses, reducing deployment time by 60% and ensuring high-fidelity agentic outputs

NYC Operational Specialist, Rove – New York, NY July 2025 – October 2025

- Designed and maintained centralized Notion database for property management operations, streamlining workflow efficiency and enabling data-driven decision making across teams
- Spearheaded market expansion initiatives by identifying and onboarding 15+ new properties, conducting feasibility assessments and coordinating cross-functional teams to ensure successful launches
- Implemented scalable property management solutions and operational protocols, optimizing maintenance workflows and improving tenant satisfaction scores by 25%

Software Engineer, JPMorgan & Chase – New York, NY 2022 – 2025

- Built a scalable solution to automate onboarding for small businesses, enabling campaign creation and management through the Chase portal.
- Deployed and configured AWS infrastructure using Terraform, reducing setup time by 50%
- Led front-end development using React and TypeScript to create a scalable and maintainable codebase
- Engineered scalable data management solutions with Amazon RDS and Cassandra
- Volunteered with Code for Good, delivering technical solutions for non-profit organizations

Software Engineer, JPMorgan & Chase – New York, NY 2021 – 2022

- Maintained and enhanced the Chase Offers platform, ensuring seamless functionality for displaying customer-facing marketing campaigns.
- Managed production and QA release deployments using Jenkins, contributing to improved deployment efficiency
- Developed and maintained features in React and TypeScript, expanding the client base
- Refactored a large-scale React/TypeScript codebase, reducing technical debt by 40%

Software Engineer, Intern, SMBC Capital Markets – New York, NY 2020 – 2021

- Developed Excel Workbooks using VBA and C to streamline internal applications
- Optimized performance and functionality of Excel-based projects through custom VBA and C scripting

Full-Stack Developer, Intern, NYC Department of Records – New York, NY 2019 – 2020

- Led the development and launch of an online homepage using Flask, PostgreSQL, HTML, CSS, and Bootstrap
- Implemented advanced search functionality and upload pages for the internal clock-in system
- Developed automation scripts to streamline operations, increasing network traffic by 60%

Founding Front-End Engineer, WiseWatch – New York, NY 2019

- Led development of a business website using HTML, CSS, and Bootstrap to create responsive designs and improve customer engagement
- Collaborated with teams to design investor pitches, using PowerPoint and data visualization tools to secure stakeholder buy-in

Certifications

AWS Certified Cloud Practitioner	September 2023
eCornell Python for Data Science Certificate	June 2024
eCornell Machine Learning Certificate	December 2024

Education

City College of New York (CUNY) , BS in Computer Science	July 2017 – May 2021
• GPA: 3.75/4.0	

Technologies

Languages: Python, TypeScript, JavaScript, SQL, Bash, C++, Java, PostgreSQL, VBA

Technologies: LangGraph, LangChain, RAG Pipelines, Pinecone, Hugging Face (PEFT/LoRA), LangSmith, Model Context Protocol (MCP), AWS (Bedrock, SageMaker, Lambda), Docker, Kubernetes, Terraform, React, React Native, Firebase, CI/CD (GitHub Actions), Jenkins, LLMOps, Vector Databases, SLM Fine-tuning, Node.js, Flask, Linux, Figma, API Design
